Re: Tug Mine

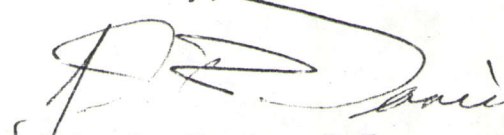

Dear Mr. Hall:

Enclosed please find two prints, #04402/1 and 04402/14, for Western States Mineral's Tug project. The prints show the proposed ultimate pit, the watershed boundary, and two sections of the proposed pit.

The outlet will be on the haul road where it exits the pit on the southern end. We do not expect any discharge, however, as the watershed area is only approximately 110 acres.

Thank you for your attention and please feel free to contact me should you require further information.

Sincerely,

John R. Danio, P.E.
Project Manager

JRD/r1p
